#### **DETAILED ACTION**

## Notice to Applicant(s)

1. This office action is responsive to the amendment filed on 10/17/05. As per request, claims 1, 16, and 22 have been amended. Thus, claims 1-27 are pending.

The prior art submitted on 5/27/05 has been considered.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2, are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi et al. (5351185).

As per claims 1-2, Takeuchi et al. disclose an electronic control device for controlling a controlled device installed on a bicycle, wherein the control device comprises: a programmed computer that controls the control device, and a reset circuit that receives information related to a traveling condition of the bicycle and provides a reset signal to the computer in response to the occurrence of a predetermined traveling condition and without dependence on the operation of the control device, and traveling condition comprises bicycle speed (see the abstract; columns 2-3, lines 25-11; columns 3-4, lines 28-9; columns 4-5, lines 27-24; and columns 5-6, lines 65-63).

## Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 3, and 21, are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi et al. (5351185) in view of Takata (5,226,501).

As per claim 3, Takeuchi et al. do not disclose the predetermined traveling condition comprises the bicycle speed being below a predetermined. However, Takata discloses the predetermined traveling condition comprises the bicycle speed being below a predetermined (see column 4, lines 3-25). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teach of Takeuchi et al. by combining the predetermined traveling condition comprises the bicycle speed being below a predetermined to accurate provide a signal to reset the circuit.

As per claim 21, Takata discloses the reset circuit comprises a reset signal output circuit, and a reset activating circuit that activates the reset signal output circuit in response to the occurrence of the predetermined traveling condition (see column 4, lines 3-25).

6. Claims 4-5, and 7, are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi et al. (5351185) in view of Ikuma (4364448).

As per claims 4-5, Takeuchi et al. do not disclose frequency output by the alternating current generator. However, Ikuma discloses the traveling condition comprises a signal output by an alternating current generator, the traveling condition comprises a frequency output by the

Art Unit: 3661

alternating current generator (see column 7, lines 20-59; and columns 10-11, lines 1-28). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teach of Takeuchi et al. by combining frequency output by the alternating current generator to generate power output for the control circuit.

As per claim 7, Ikuma discloses the traveling condition comprises a voltage output by an alternating current generator (see columns 15-16, lines 66-34).

7. Claims 6, 8-20, 22-27, are allowable.

#### Remarks

- 8. Applicant's argument filed on 10/17/05 has been fully considered. Upon updated search, the new ground of rejection has been set forth as above.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 571-272-6968. The examiner can normally be reached on M-F 6:30 AM-4:00 PM), off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 571-272-6956. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
